

Two of the Power Components team took part in the **Nike Human Race**, the 10 km run with charity purposes organised by the famous sportswear brand, which was run on **August 31st in 24 cities worldwide**, from Taipei to Los Angeles.

Approximately 30 CNH people ran in different cities (London, Roma and Chicago) in order to raise money for 3 associations: **WWF** (World Wild Life), the **Lance Armstrong Foundation** for cancer research, and **Nine Million.org**, the campaign launched in 2006 by the UN for giving nine million refugee children worldwide the chance to learn and play.

Our Power Components guys commuted from Basildon to Wembley stadium to assist to the concert organised by Nike (Moby, Pendulum) and then, after a bit of dancing as a warm up, run for few kilometres! **Benjamin** supported and encouraged Olivier during the race and it looks like he did a good job. Indeed, **Olivier** completed the 10K in a bit more than 38' which make s him **CNH faster runner**. Worldwide, he finished in a good position.

Hopefully, the event will be organised again next year and we should be able to see all the power components team running.
